RED LAKE CURRANT

This remarkable new currant should be planted extensively both commercially and in the home garden. The berries are the size of Perfection, but the clusters are larger and better. The stems are much longer—greatly increasing the speed of picking. Berries will not burn readily in the sun.

ROUTE 4, HILLSBORO, OREGON

December 18, 1943

Dear Fellow Nurseryman:

We take this opportunity to express our appreciation for your continued patronage and to assure you that we will do our utmost to serve you in the best possible manner in spite of difficult and trying circumstances under which we must operate.

Our catalog has been delayed in reaching you because of labor shortages and increased demands for printing in the local presses. It is our hope that this delay has not handicapped you.

Though some shipments may be delayed somewhat because of labor shortages, gasoline rationing, weather conditions and stock shortages, we are glad to do what we can to help our Nation's war effort.

Although some sizes of plants are exhausted we still have quite a full line of fruit trees, nut trees, small fruits, ornamental trees, shrubs, vines and many roses of superior quality. In ordering it will facilitate matters if a second choice of sizes or variety is indicated where permissible.

Again thanking you for your past favors, we anticipate your future orders.

Very truly yours,

RICH & SONS NURSERY

Dear Fellow Americans:

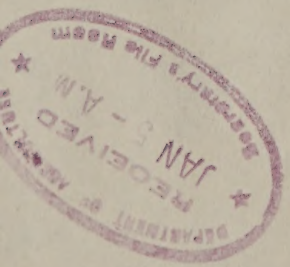

For your convenience, I am enclosing a copy of the report which I have just received from the National Security Council. It is a report on the activities of the Soviet Union in the United States.

The report is a long and detailed one, and I am sure that you will find it of great interest. It is a report on the activities of the Soviet Union in the United States, and it is a report that I am sure that you will find of great interest.
